Bauman Moscow State Technical University, Moscow, 105005, Russia

*Hierarchical modeling of complex discrete systems using macromodels on the level of functional blocks to analyze and control its correct functioning at the early stages of development and design are considered. A macromodel of the functional block of complex discrete structure, formalized the logical sequentially scheme  $\hat{S}$  is described.*

**Keywords:** *program slicing, program analysis, dynamic languages.*

**Kryuchkov A.O.** (b.1990) graduated from bachelor of Bauman Moscow State Technical University in 2011. Undergraduate of the Software and Information Technologies Department of Bauman Moscow State Technical University. Scientific interests: program analysis and network protocols. e-mail: alexey.kruchkov@gmail.com

**Krishchenko V.A.** (b. 1975) graduated from masters of Bauman Moscow State Technical University in 1998. Ph.D., Assoc. Professor of the Software and Information Technologies Department of Bauman Moscow State Technical University. Author of more than 15 publications and is currently interested in software and network protocols verification and static and dynamic analysis of software. e-mail: kva@bmstu.ru
