Mathematical simulation of the flight based on traditional approaches used to subsonic passenger aircraft. Optimization of flight segment associated with the acceleration – climb held with the consideration of multiple criteria optimization. When modeling the flight uses a built-in model circuit turbojet engine, allowing to calculate the characteristics of the power plant under all flight conditions.

Keywords: *flight simulation, modeling GTE, optimization program of the flight of passenger aircraft.*

E.A. Gubareva (b. 1982) graduated from Lomonosov Moscow State University in 2004. Ph.D., Assoc. Professor of the Computational Mathematics and Mathematical Physics Department of Bauman Moscow State Technical University. Author of 8 publications in the field of contact mechanics. e-mail: gubareva_ea@pochta.ru.

T.Yu. Mozzhorina (b. 1959) graduated from Moscow Aviation Institute in 1982, Ph.D., Assoc. Professor of the Computational Mathematics and Mathematical Physics Department of Bauman Moscow State Technical University. Author of 15 publications in the field of mathematical simulations turbojet engine, of mathematical simulations flight of airplane, of optimization power-plant in system of airplane. e-mail: mozzhorina@mail.ru.
